

# URBAN RANGE

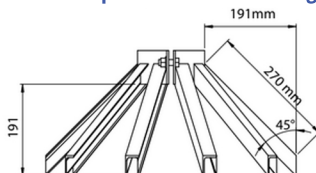

# ANTI-CLIMBING COLLARS PROTECTION ACCESSORIES

ANTI-CLIMBING collars are to be set on the mast at minimum height of 2.60 meters. They protect the camera from direct attack by individuals climbing to the top of the mast. The two-way version is designed for masts placed close to a perimeter wall, and also prevent from climbing down the mast if trying to break in a sensitive site.

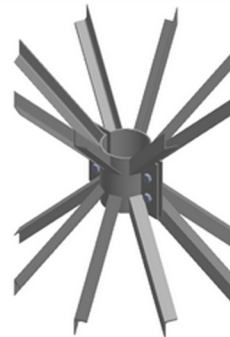

## One-way version

Ø of the bride to be specified when ordering

## Also available in double-way version
