

URBAN RANGE

CONSOLE CITYPROTECT

With camera brackets from range CITYPROTECT, the camera is mounted on a vertical or horizontal plane in a stable and solid manner. A flange connection secured by tamper-proof screws allows rotation only by authorised personnel.

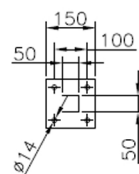

details

locking of the position by
tamper-proof security screw

A wide range of bracket configurations is available, to suit every type of situation : facade mounting, parapet mounting or mounting on an existing mast

Mounting system for vertical or lateral plane against the mast.

Optional system with double row of screws to directly insert the bracket into the mast shaft

☐ Options upon request
